In conjunction
with

OUR MISSION & VISION

To be recognized as a leading and committed Cybersecurity & Technology services company in USA and around the world that can be trusted unconditionally for innovative and dynamic solutions and services in mission critical cyber defense. To facilitate the best-of-the breed training and consulting services and to deliver secure, innovative, and dependable products to clients.

WHY AAIT, Inc.

AAITI is second to none in Job Preparation as well as in Cybersecurity & Information Assurance Training. We have a wealth of experience in the field. We are innovative, responsive, and committed. We listen, learn, and deliver solutions that always outperform our competitors. We optimize services that delights our customers. Please let us know what we can do for you.

CYBERSECURITY & INFORMATION ASSURANCE TRAINING

Dr. Em Pannah teaches most of the classes here. Our training courses are hands-on and job oriented. Dr. Pannah is an Associate Professor in the Cybersecurity & Information Assurance Department of the University of Maryland (UMUC). Em teaches Cybersecurity, Communication & Network Security, Security Engineering, Risk Management, CISSP, Information Assurance, etc. classes for 16 years there. He was Course Chair of the CISSP Program. Most of his students are from US Army, Navy, and Air Force. Dr. Pannah also taught at Strayer University for several years. Em has 45 years of Hands-On and Management experience in Information Technology (IT), Cybersecurity, Privacy, Identity Theft, Information Assurance (IA), Critical Infrastructure Protection (CIP), Enterprise IT Risk Management, Security Audit, Assessment & Authorization, Regulatory Compliance, etc. as Program Manager, Cybersecurity Director, Vice President, and Chief Information Security Officer. Dr. Pannah worked for the Department of Homeland Security (DHS), Federal Aviation Authority (FAA), National Oceanic & Atmospheric Administration (NOAA), Department of Commerce (DOC), Alcohol, Tobacco, Firearms & Explosives (ATF), US Mint, Office of Personnel Management, US Department of Agriculture (USDA), Department of Interior (DOI), National Institute of Health (NIH), State of Maryland, State of Hawaii, B3 Solutions, IDGMI, OnPoint, TRUMP Taj Mahal Casino & Hotel, International Diarrhea Hospital (ICDDR), Deutsche Bank, University of Maryland, Johns Hopkins University, etc.

SECURITY SERVICES

We provide defense-in-depth to protect our clients' assets from outside & inside attacks. Our trained, certified & experienced information security experts work with clients for implementing multiple layers of countermeasures to establish castles. We implement FIPS-140 standards to protect clients' data both in transit & at rest. Our experts have 20 years of experience in cryptography & cryptosystems, encryption & decryption, hashing, public key infrastructure (PKI), and digital signature. AAITI provides state-of-the-art IT risk management services to its clients by analyzing the security posture of clients' information systems & selecting, implementing, and constantly monitoring the right set of security tools and controls to minimize IT risk.

Providing confidentiality, integrity & availability (CIA) in wired, wireless, satellite & other telecommunication services is our specialty. We strictly follow NIST-SP-800 guidelines in protecting our clients' General Support Systems (GSS) and Major Applications (MA). In addition to establishing a solid defense, we provide detective security services like intrusion detection & preventive security services like intrusion prevention. We help our clients in performing vulnerability scanning, penetration testing (ethical hacking), patching & reporting. Our identity & access management (IAM) experts work to implement effective IAM solutions including multi-factor authentication & resource authorization. We have 20 years of hands-on experience here.

Dr. Em Pannah, our president, is a Certified Authorization Profession (CAP) & has performed Assessment & Authorization (A&A) and Independent Verification & Validation (IV&V) of 20+ information systems belong to 12 US Federal Departments in last 14 years. Dr. Pannah is also a Certified Information Systems Security Professional (CISSP), Certified Information Security Manager (CISM), National Security Agency - INFOSEC Assessment Methodology (NSA-IAM), National Security Agency - INFOSEC Evaluation Methodology (NSA-IEM), and Graduate Certificate in Cybersecurity (GCC). We are, simply, the best in performing A&A. Please contact us confidently for your Security Assessment, A&A, IV&V, Gap Analysis needs.
